BILLING CODE 4510-79-M

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: U. S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection

request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review and approval of a new information collection under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: Joint NRC/EPA Survey of Sewage Sludge/Ash.
2. Current OMB approval number: None.
3. How often the collection is required: This is a one-time collection.
4. Who is required or asked to report: Selected publicly owned treatment works (POTWs), and Agreement States.
5. The number of annual respondents: 600 POTWs for the questionnaire, and 300 POTWs for sample collection, plus 29 Agreement States for reporting of Zip Codes.
6. The number of hours needed annually to complete the requirement or request: An average of 2 hours per respondent for questionnaires and 6 hours each for selected respondents for collecting samples, plus 8 hours each for 29 Agreement States. The total burden is 3,232 hours.

7. Abstract: The survey will obtain national estimates of the levels of radioactive materials in sludge and ash at POTWs, estimate the extent to which radioactive contamination comes from either NRC/Agreement State licensees or from naturally occurring radioactivity, and support possible rulemaking decisions by NRC and EPA. NRC and EPA will send questionnaires to selected POTWs. Based on the results of that survey, NRC will identify approximately 300 POTWs from which samples of sewer sludge/ash will be taken and analyzed. Results of the full survey will be published for use by Federal agencies, States, POTWs, and local POTW officials.

Submit, by March 7, 1997, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
